

week-3-lesson-1

Task-1

Write a program that calculates the squares and cubes of the numbers from 0 to 10 and uses tabs to print the following table of values:

<LINELENGTH>50</LINELENGTH>

number	square	cube
--------	--------	------

0	0	0
---	---	---

1	1	1
---	---	---

2	4	8
---	---	---

3	9	27
---	---	----

4	16	64
---	----	----

5	25	125
---	----	-----

6	36	216
---	----	-----

7	49	343
---	----	-----

8	64	512
---	----	-----

9	81	729
---	----	-----

10	100	1000
----	-----	------

Task-2

Write a program that reads in the side of a square and then prints that square out of asterisks.

Your program should work for squares of all side sizes between 1 and 20. For example, if your program reads a size of 4, it should print

<LINELENGTH>50</LINELENGTH>

Task-3

Write a program that calculates and prints the sum of even numbers from 2 to 10 (inclusive) using a single for loop.

Task-4

Write a program that calculates and prints the sum of the numbers from 1 to 10 using a single for loop

Task-5

Given the number 1234 print out every digit separately using the while loop.
